

Lexmark Print Management

Tap into your printer's full potential

Offices tend to print a lot of pages unnecessarily. Is it time to rethink the way you deal with paper? Cut paper waste and improve printing efficiency with Lexmark Print Management.

Improve printing mobility and security

From desktops or laptops to tablets and smartphones, submitting print jobs is more convenient than ever. Lexmark's years of experience with mobile printing can help your organization take advantage of this efficient technology. With Lexmark Print Management Solutions, your business can print from anywhere in just four simple steps: submit, release, select and go. Easily submit print jobs from across the hall or around the world through email submissions or the Lexmark Mobile Printing App.

Leveraging Lexmark Print Management's Print Release capabilities can help you maintain confidentiality too. Unlike traditional print jobs, Print Release ensures your documents won't be left exposed

until you can retrieve them. Instead, Print Release routes print jobs through a "print cloud," where documents wait until you release them with your unique login.

Reduce waste

Based on Lexmark's internal experience, approximately 20 percent of print jobs sent are never printed. By preventing excess or accidental printing, you can reduce costs. Didn't want to print something? No worries. You can select jobs to print, print and save, or delete.

Combined with Print Release, Document Accounting completes the solution bundle to give the full picture of your company's printing needs and habits. Easily analyze data collected from all jobs printed, copied, scanned or faxed from your devices. Document Accounting compiles data into

customizable reports that are accurate and useful. Be ahead of the majority of organizations who have no idea how much they print.

Flexible management options

You can take advantage of a new way to manage printing via Software as a Service (SaaS) technology. This Lexmark-managed, pay-per-user option gives your company access to all aspects of our print management solutions with minimal up front capital expense.

SaaS reduces IT infrastructure and burden, and offers immediate scalability without extra costs for installation and ongoing maintenance. Lexmark professionals will work with your business to identify the best delivery model for your company.

Lexmark Print Management consists of three solutions; Lexmark Print Release, Lexmark Document Accounting and Lexmark Mobile Printing.

Benefits of Print Management

- ▶ Easy to use mobile app
- ▶ Reduce printing cost and paper waste
- ▶ Improve document security
- ▶ Set user quotas for color or total impressions
- ▶ Flexible deployment options through cloud subscriptions or on-site
